PROFESSIONAL SUMMARY

AI Engineer and final-year B.E. AI & Data Science student with hands-on experience building and deploying production AI systems. Currently building company-wide LLM and RAG automation as an AI Workflow Automation Intern. Strengths in LLM integration, retrieval-augmented generation, agentic systems, and full-stack deployment, with a track record of shipping real products end to end. Seeking AI Engineer roles focused on applied LLM, RAG, and agentic systems.

SKILLS

AI / ML & LLM: LLMs, RAG Pipelines, Agentic Systems (Google ADK, MCP), Embeddings, Vector Search, Prompt Engineering, Fine-tuning, NLP, Sentiment and Emotion Classification, Computer Vision (YOLOv8, Pose Estimation)

Languages & Backend: Python (Pandas, NumPy, Scikit-learn), FastAPI, Flask, Node.js, Express.js, REST APIs, Webhooks, asyncpg, Google Apps Script (GAS)

Databases: PostgreSQL, pgvector, AlloyDB, MongoDB, Supabase, Firestore, SQL

Cloud & DevOps: Google Cloud (Cloud Run, Vertex AI, AlloyDB), Docker, Vercel, Railway, Render, Microsoft Azure, Firebase

Frontend: React 19, Next.js, Three.js, Vite

Tools: Claude (advanced workflows), Git, GitHub

Spoken Languages: English (C1), Hindi (C1), Tamil (B2), Malayalam (B1)

EXPERIENCE

AI Workflow Automation Intern

2026 – Present

LLM, RAG, Python, Google Apps Script, Claude

- Built and deployed company-wide workflow automation powered by LLM-driven RAG pipelines, reducing manual effort across internal operations.
- Developed reusable AI skills for company use cases, standardizing how internal teams apply LLM automation to recurring tasks.
- Currently building a candidate recommendation system using high-dimensional embedding mapping and similarity-based candidate pooling and ranking.
- Applied advanced Claude workflows and Google Apps Script to integrate AI automation directly into existing business tools.

PROJECTS

Serenity — Multimodal AI Mental Health Assistant

[serenity.nipun.space](#)

React 19, Python, Railway, Supabase (PostgreSQL), LLM APIs

- Built and deployed a production multimodal AI mental health assistant with full-stack architecture and auth.
- Engineered an LLM-powered empathetic response pipeline with prompt engineering and context management; reached 95% safety recall on crisis detection and 81.3% emotion classification accuracy at 680 ms median response time.
- Authored full technical documentation (architecture, ER diagrams, auth flow) and submitted a research paper to ICRAIA 2025.

PRAGATI — Self-Assembling Agentic Intelligence System

github.com/Luc0-0/pragati

Google ADK, MCP Toolbox, AlloyDB, Vertex AI (Gemini Flash), FastAPI, Cloud Run

- Built for the Google Gen AI Academy APAC Cohort 1 Hackathon (AI Agents with ADK) and deployed live on Cloud Run.
- Designed a Root Orchestrator agent that introspects AlloyDB schemas at runtime, generates MCP tool definitions dynamically, and routes natural-language queries to the self-assembled tools with zero hardcoded tools.
- Built schema-introspection and tool-generation sub-agents; integrated Gemini Flash over 7,894 rows of public health data; containerized with Docker and deployed with FastAPI, asyncpg, and pgvector.

Guardia — Real-Time Fall Detection System for Elderly Care

github.com/.../guardia_final-year

Python, OpenCV, YOLOv8-pose, Twilio, Kotlin, TensorFlow Lite

- Engineered a real-time computer-vision pipeline using YOLOv8 pose estimation with multi-signal fall heuristics (velocity, posture aspect ratio, spine angle), flagging a fall only when at least 2 of 3 signals fire to suppress false positives.
- Achieved 91.0% accuracy, 85.0% recall, and a 7.3% false-positive rate across 75 test clips; full detection-to-alert pipeline (SMS / WhatsApp via Twilio) completes in about 12 seconds.
- Delivered a companion Android app (Kotlin, TensorFlow Lite, CameraX) running on-device inference for offline reliability.

Intelligent Q&A System for Indian Agriculture

Python, Flask, NLP, Embeddings

- Built an AI Q&A engine retrieving answers from live Indian government agricultural datasets (data.gov.in).
- Implemented context-aware NLP query interpretation with provenance tracking and a low-latency, scalable API backend.

Elevated Smart Notes — AI-Powered Workspace

React, Firebase, Gemini API, NLP

- Shipped an AI note-taking app with real-time collaboration, summarization, tone modification, and structured content generation via Gemini.

EDUCATION

B.E. Artificial Intelligence & Data Science — Kathir College of Engineering

GPA 8.24 | Graduating 2026

CERTIFICATIONS

- Google Gen AI Academy APAC — Cohort 1 (Jan–Apr 2026)
- IBM AI Developer Professional Certificate — 10-course specialization
- Microsoft Azure AI Fundamentals
- Python for Data Science — IBM
- Prompt Engineering Fundamentals

ACHIEVEMENTS

- National-level Maths Olympiad — Delhi Zonal 2nd position
- 15+ shipped projects across AI agents, computer vision, NLP, RAG pipelines, and full-stack systems (github.com/Luc0-0)
- Inter-college football and chess competitor (Chess.com Rapid ~1400)
